Topic: Cleaning up the Environment

Dear Mr Clarke

Today Mummy and I and our dogs went on a walk to pick up litter. We took a lot of plastic shopping bags to put the plastic we find in, and we brought gardening gloves to pick up the litter with.

We found some yucky things and some huge plastic bags. One of the yucky things was a nappy and the other worst was a coca cola can full of old wee. I found a tiny sharp plastic top of a milk bottle that a mouse could get stuck in and we also found plastic straws and plastic wrappers and huge plastic bags

all ripped up probably by animals and loads and loads of cans.

The dogs helped find things by sniffing them out.

Whilst we were on our walk we were boiling because we were wearing long sleeved tops and trousers so if there were spiky bits it wouldn't hurt our skin. We were also wearing big shoes to protect our feet and plastic gloves to protect our hands.

It was very smelly when we picked up the yucky things.

I thought we were doing a great thing cleaning up the environment and Mummy and I want to keep doing it.
